

Is Your Intercom System at Risk?

A Practical Upgrade Planning Checklist for MCSTs

Plan ahead. Avoid breakdowns. Upgrade with confidence.

Securevision — Connecting People, Securing Places

1. System Health Check

- ■ System is more than 5–8 years old
- ■ Replacement parts are difficult to source
- ■ Vendor support is limited or unavailable
- ■ Repairs are becoming more frequent
- ■ Downtime is increasing
- ■ Audio/video quality is poor

If you checked 2 or more: Your system may already be at risk of failure.

2. Operational Impact

- ■ Guards frequently assist with access
- ■ Residents miss or complain about calls
- ■ Visitors experience delays
- ■ Manual processes used during faults
- ■ No remote/mobile answering

3. Future Readiness

- ■ Residents expect mobile access
- ■ Need visitor pre-registration
- ■ Require access logs / audit trail
- ■ Planning integration with LPR or access control
- ■ Looking to reduce manpower reliance

4. Infrastructure Readiness

- ■ Existing cabling assessed
- ■ Potential to reuse infrastructure evaluated
- ■ Network/IP readiness considered
- ■ Installation constraints identified

5. Planning & Budget

- ■ Repair vs upgrade comparison done
- ■ Budget approach considered (CAPEX / phased / subscription)
- ■ Vendor support lifecycle evaluated
- ■ Upgrade timeline planned
- ■ MCST approval process considered

Final Score

0–3 → Monitor

4–7 → Plan upgrade

8+ → Upgrade recommended
